## CAPSTONE

**A. Create one or more of the following:** System for Parents/Elders, System for Preserving Family History, System for Household Abundance, System for Generational Wealth

**B. Invent a system/app/etc. that will help solve or address a challenge within your community. Some solutions may include, but is not limited to, the following sectors:**

1. Healthcare
2. Automotive
3. Agriculture
4. Law Enforcement/Military/Fire & Rescue
5. Education
6. Faith-based systems/digital maps that track, chart, and map regions at high risk for religious 'persecution'. Then, utilize data to mobilize resources and non-intrusive intervention to reduce risk in such areas – ultimately making the environment less appealing for adverse actions against it.
7. Finance/Banking

**Identify a team of co-laborers/partners that may want to participate. Organize the concept, develop the strategy, and execute together.**
